```gherkin
Feature: BWell Testing task
  As a User who is interested in CMS platforms
  I want to create Appointments
  So that I can plan my activities at "http://login.myappcms.com/build"

Background:
  Given the user is on the "http://login.myappcms.com/" home page
  And they type "CMS Demo Account" as the App Name
  And they type "demo@diyappdesigner.com" as the Email address
  And they type "demo123" as the Password
  When they click on Sign in button
  Then they should see the CMS Demo Account Dashboard

Scenario: User can see Add Service Appointment form
  Given the user is on the CMS Demo Account Dashboard page
  When the user clicks on the Appointments item in the sidebar
  And the user clicks on the Services sub-item below the Appointments item
  And the user clicks on the Add button under the Services tab
  Then the user can see the Services addition form

Scenario Outline: User Adds Service Appointment
  Given the user is on the Services addition form
  And the user has clicked the Add button
  When the user enters the value "<value>" in the field "<fieldname>"
  And the user clicks on the Save button
  Then the Service Name, Service Description, Duration, Price and Opening Hours
should be evident in the Services list

  Examples: Fields
    | fieldname | value |
    | Service Name | With a Smile |
    | Service Description | It's our middle name |
    | Duration | 1:10 |
    | Price | 20.00 |
    | Opening Hours | 08:00 - 17:00 |

hydrate-photo-pixabay-23.png |
    | Column7 | Collum 7 |
    | Column8 | Call 'em 8 |
    | Sheet1 | Sheets to the wind |

Scenario: User can Update Services Appointment entry
  Given the user is on the Services list pane
```

When the user clicks the Edit (pencil) icon for the previously-created appointment
  And the user changes the Service Name to "Testing Services"
  And the user clicks on the Save button
  Then the updated Service Name "Testing Services" should be evident in the Services list

Scenario: User can Cancel an Update Services Appointment entry
  Given the user is on the Services list pane
  When the user clicks the Edit (pencil) icon for the previously-created appointment
  And the user changes the Service Name from "Testing Services" to "Service Not Saved"
  And the user clicks on the Cancel button
  Then the Service Name "Testing Services" should still be evident in the Services list

Scenario: User can Delete Services Appointment entry
  Given the user is on the Services list pane
  When the user clicks the Delete (trashcan) icon for the previously-created appointment "Testing Services"
  And the user clicks Yes in response to "Are you sure you want to remove this item?"
  Then the previously-created Service Name "Testing Services" should be removed from the Services list
