```gherkin
Feature: CMS Blog Functionality Tests
  As a QA Tester evaluating the CMS Demo Account
  I want to examine the Blog posts section
  So that I can be assured creation and editing works properly

Background:
    Given the user is on the "http://login.myappcms.com/" home page
    And they type "CMS Demo Account" as the App Name
    And they type "demo@diyappdesigner.com" as the Email address
    And they type "demo123" as the Password
    When they click on Sign in button
    Then they should see the CMS Demo Account Dashboard

Scenario: User can view Blog creation form
  Given the user is on the CMS Demo Account Dashboard page
  When the user clicks on the Blog item in the sidebar
  And the user clicks on the Add button in the Blog pane
  Then the user can see the Blog addition form

Scenario Outline: User Adds New Blog post
  Given the user is on the Blog creation form
  When the user enters the value "<value>" in the field "<fieldname>"
  And the user clicks on the Save button
  Then the Blog Title, Image, Author, and Date should be evident in the Blog list

  Examples: Fields
    | fieldname | value |
    | Title | Gherkin without the Pickle |
    | Image | http://messageconsulting.com/wp-content/uploads/2016/04/CucumberLogo.png |
    | Author | Otto Mayter |
    | Date | 01-08-2020 15:00 |
    | Category | [lang_EN]Technology[/lang_EN][lang_PT]Tecnologia[/lang_PT] |
    | Intro | Learning Gherkin is not as hard as you might think! |
    | Content | Read this article for a good start. |
    | URL | https://cucumber.io/docs/gherkin/reference/ |
    | Tags | programming, cucumber, bdd |

Scenario: User can Update Blog entry
  Given the user is on the Blog list pane
  When the user clicks the Edit (pencil) icon for the previously-created blog
entry
  And the user changes the Blog Title to "Cucumber - Not Just Ruby Any More!"
```

And the user clicks on the Save button
    Then the updated Blog Title "Cucumber - Not Just Ruby Any More!" should be evident in the Blog list

Scenario: User can Cancel an Blog Update
    Given the user is on the Blog list pane
    When the user clicks the Edit (pencil) icon for the previously-created blog entry
    And the user clicks the Draft checkbox
    And the user clicks on the Cancel button
    Then the value of False should be evident in the Blog list for that blog entry
